

Searchlight Resources Inc., (SCLT.V) has assembled a compelling portfolio of mining assets, including gold, copper, zinc, cobalt, vanadium, rare earth targets in one of the most favorable mining jurisdictions in the world, located in northern Saskatchewan, Canada

“The best place to find a new mine is next door to an old mine or existing mine” -Tom Zoellner

Key Highlights:

- Experienced and highly Skilled Management & Exploration team involved with discovery of multiple mines and decades of experience in Junior exploration management.
- **Major focus on High Grade Gold** in known Saskatchewan gold camps, geology similar to Red Lake Gold camp in Ontario, but underexplored
- Bootleg Lake Project targets an extensive gold system with **4 past producing gold mines** (all within 5 kilometers of each other) and extensive underground workings.
- Significant **open pit bulk tonnage** mining concept can be developed with modest resources similar to Atlantic Gold's strategy.
- Flin Flon mining camp is the **best copper mining district in Canada** but has been neglected by HudBay Minerals Inc. (over 30 producing mines in the area)
- Gold and Copper development can be expedited due to **brownfields mine site**, extensive underground workings and close proximity to a major mining center and infrastructure. (**10 kilometers away from Flin Flon, MB**)
- Recent Copper discovery by **Callinex Mines Inc. (CNX.V)**, in the district is likely to attract investor interest to the surrounding area & Searchlight
- **Undervalued** compared to its peer group
